About this action:

Gustav is locking himself to a coal plant
to prevent Nuon to build it any further.

Shell - Rotterdam

About this action

We want to hold oil companies accountable for the damage from Arctic drilling by focussing public attention on it. Today we storm the Shell head quaters and put up huge banners on the building. With your help we can create a huge buzz and force them to stop polluting the Arctic region; a place that should remain untouched for the climate balance worldwide, as well as all the endangered species that should be protected.

Be a dare-devil, sign this petition!
